

Mobidiag develops innovative molecular solutions to advance the diagnosis of infectious diseases and antibiotic resistances. With its broad range of tests and instruments based on well-established PCR technology, Mobidiag allows fast and cost-efficient detection of most common bacteria, parasites, viruses and antibiotic resistances to answer any microbiology laboratory requirements. Mobidiag is headquartered in Espoo, Finland with subsidiaries in France, Sweden and UK. For more information about Mobidiag, please visit [www.mobidiag.com](http://www.mobidiag.com)

We are now looking for a talented

## SOFTWARE ENGINEER

to join our growing team in Espoo

In this position you will develop application software for our in vitro diagnostic products. You will work closely with our domain experts to design and implement applications with intuitive user interface. You are expected to give strong contribution in both UI and business logic code. As a member of our in-house software development team you are responsible for writing good quality software using agile methods and tools. A successful candidate has a proven track record in developing real life desktop applications. As a professional you understand what makes clean code and accept nothing less from yourself. You translate requirements into design and implementation of well-structured and documented software components. The right candidate will be a self-motivated positive person who puts team goals ahead of individual accomplishments and collaborates often and effectively with project team members to achieve the scheduled work.

We expect you to have

- a BSc or MSc in Computer Science or equivalent knowledge
- Solid programming skills
- Ability to write good quality test covered code (unit tests, TDD)
- Experience in C#/Java or similar
- Fluent verbal and written communication skills in English
- Passion for taking new challenges and an open mindset
- Good teamwork skills
- Willingness to travel occasionally

The following will be considered as an advantage

- Understanding of embedded software development
- Experience in relational databases

We offer you

As a fast-growing dynamic international company Mobidiag has doubled its personnel in two years. The success of Mobidiag is based on our people and especially to their technical expertise and enthusiasm. With our 90 employees located in four different countries we promote the approach of "human-sized" company where our people are at the center of the attention with focus on professional and personal development. We foster well-being of all our people and want to maintain the mix of professionalism, enthusiasm and excellent team spirit also in the future. Join our team now and become a next MOBeliever!

For more information please contact Director, Software Development Jukka Ahonen by email [jukka.ahonen@mobidiag.com](mailto:jukka.ahonen@mobidiag.com) or by phone +358 50 386 6585. Please send your CV and application with a salary request as soon as possible and no later than June 15th to Hanna Osara at [hanna.osara@mobidiag.com](mailto:hanna.osara@mobidiag.com). Use the reference "Software Engineer, Espoo" in the message subject line.
