

We are Mobidiag, team of almost 100 people in 4 countries driven by creating something meaningful and helping the world to be a better place by offering solutions to detect infectious diseases and antibiotic resistance. By using our tests patients get targeted treatment faster, more efficiently and more reliably.

We take our jobs seriously because we're doing something important for the world. We can't do it alone and we need the best people. Are you one of them?

We are now looking for a talented **PRODUCTION ENGINEER** to join our growing team in Espoo. In this position you will be responsible for ensuring production equipment is operating efficiently and in accordance with standard operating procedures. You will provide support to production team through process improvements, resolve product and component issues, and assist with standardizing and scaling up production processes.

Your key responsibilities are the following:

- Ensure production of high quality products in a safe manner. Recommend and implement measures to improve production methods, equipment performance and deliver quality product to our customers.
- Suggest and implement changes in production environment, facilities, and equipment to increase efficiency of operations and to generate optimal product yield.
- Provide technical expertise and support for the production processes and analyze and resolve any technical and operational issues.
- Document processes, create and maintain work instructions and provide training as necessary.

Ideally, you should have:

- Bachelor's degree in an engineering discipline coupled with 3 – 5 years' experience as a Production Engineer or similar role
- Solid experience in production concepts, methods and practices, preferably in biotechnical company
- Excellent communication, analytical and organizational skills. Ability to effectively communicate with different levels of the organization, both in Finnish and English
- Capability to multitask in a rapid paced environment
- Good team work skills and you can throw a few jokes occasionally

We offer you:

- Possibility to grow and expand your expertise –working in a growing company you will get involved in full spectrum of challenges
- Having fun – your future team members are enthusiastic, energetic and talented
- Opportunities to learn continuously – we believe in investing in our employees and ensuring their knowhow is top notch
- Balance between work and leisure time – we appreciate you when you're not working too, and want to ensure you can recharge and have fulfilled leisure time before going back to saving the world

- Ongoing company meetings and events – we believe that having all the staff together for couple of days outside the office brings added value for both the company and the employees

You love it here if you:

- Are excited to be one of the key players in building meaningful and important solutions
- Like everything about taking new challenges and have an open mindset
- Like to collaborate and work in teams but also can fly solo
- Want to work in an environment adapted to employee's needs
- Want to grow and brush up your development skills among experienced and fun colleagues

If you have any questions or doubts, please contact Director, Production Laura Huopaniemi by email laura.huopaniemi@mobidiag.com or by phone +358 40 504 0728. If you already made your decision, please send your CV and application to HR Manager Hanna Osara at hanna.osara@mobidiag.com by August 12th. Use "Production Engineer" in the subject line.

We'd love to meet you and hopefully have you on board!
