

Mobidiag develops innovative molecular solutions to advance the diagnosis of infectious diseases and antibiotic resistances. With its broad range of tests and instruments based on well-established PCR technology, Mobidiag allows fast and cost-efficient detection of most common bacteria, parasites, viruses and antibiotic resistances to answer any microbiology laboratory requirements. Mobidiag is headquartered in Espoo, Finland with subsidiaries in France, Sweden and [UK](#). www.mobidiag.com

We are Mobidiag, team of over 160 people in 4 countries driven by creating something meaningful and helping the world to be a better place by offering solutions to detect infectious diseases, including COVID-19, and antibiotic resistance. With our tests, patients can get targeted treatment faster, more efficiently and more reliably. We take our jobs seriously because we're doing something important for the world. We can't do it alone and we need the best people. Are you one of them?

We are now looking for a talented

SOFTWARE ENGINEER

to join our growing team in Espoo

In this position you will develop software tools and application software for both inhouse and external use. You will work closely with experts of different various domains from different functions in the company. You'll also work as part of our inhouse IT team and in close cooperation with software development team developing the software embedded to our products. You are expected to give strong contribution in both UI and business logic code. You should be capable of independently developing inhouse software tools and also contributing to software for external use. For doing this, you'll get the support of our experienced in-house software development team.

You are responsible for writing good quality software using agile methods and tools and documenting your work. A successful candidate has a proven track record in developing functional software for real life use. As a professional you understand what makes clean code and accept nothing less from yourself. You translate requirements into design and implementation of well-structured and documented software. The right candidate will be a self-motivated positive person who puts team goals ahead of individual accomplishments and collaborates often and effectively with both with other members of the Mobidiag team.

We expect you to have

- a BSc or MSc in Computer Science or equivalent knowledge
- Solid programming skills
- Attitude to get things done
- Ability to write good quality test covered code (unit tests, TDD)
- Experience in C#/Java or similar
- Experience in one or more scripting languages
- Fluent verbal and written communication skills in English
- Passion for taking new challenges and an open mindset
- Good teamwork skills
- Willingness to travel occasionally

We offer you:

- Possibility to grow and expand your expertise – working in a growing company you will get involved in full spectrum of challenges

- Having fun – your future team members are enthusiastic, energetic and talented
- Opportunities to learn continuously – we believe in investing in our employees and ensuring their knowhow is top notch
- Balance between work and leisure time – we appreciate you when you're not working too, and want to ensure you can recharge and have fulfilled leisure time

For more information please contact Director, Software Development Jukka Ahonen by email jukka.ahonen@mobidiag.com or by phone +358 50 386 6585.

Please send your CV and application with a salary request as soon as possible and no later than October 2, 2020 to recruitment@mobidiag.com. Use the reference "Software Engineer, Espoo" in the message subject line.
